

FAN KAIWEI

Senior Fullstack Developer

+65 93286060 • kaiweifan11@gmail.com • www.linkedin.com/in/kaiwei-fan-pmp-122960133 • Singapore
Singaporean Citizen

Executive Summary

A Senior developer familiar with a wide range of programming utilities and languages. Knowledgeable of backend and frontend development requirements. Collaborative team player with excellent technical abilities offering many years of related experience. Always willing to take up challenges and learn new technologies.

Education

National University of Singapore

Bachelor Degree in Computing (Information Systems)

2007 – 2011

Project Management Institute

Project Management Professional (PMP) Certification

2017

Stanford University | Online

Machine Learning Certification

2018

Experience

Datwyler IT Infra Pte. Ltd

Singapore

Senior Fullstack Developer

11/2022 - Present

- Senior in Datwyler, I led the frontend development of an IoT platform, enabling users to connect and remotely control devices while monitoring telemetry data
- Integrated interactive map (using Mapbox/OpenStreetMap) to display real-time device locations globally.
- Developed internationalized translations to provide multi-language support for global user base.
- I help to manage a small team of 4 developers, by assigning tasks and helping them solve complex problems
- Collaborated with cross-regional stakeholders from China and Europe to gather requirements and ensure seamless product delivery
- Designed and implemented CI/CD pipelines using Bitbucket, Azure Devops and automated deployments to Azure.
- Developed proof-of-concept (POC) solutions for new features, fostering innovation within the engineering team.
- Participated in recruitment process by interviewing candidates.

Technologies used: **Javascript, ReactJS, Typescript, React-Hook-Form, React-intl, React-Router, Ant Design, Material UI, Microfrontends, styled-components, GraphQL (Apollo Client), Mapbox, Java Springboot, Webpack, Docker, Kubernetes, PostgreSQL, MariaDB, Azure Devops, Bitbucket Pipelines**

Equinix, Inc Equinix

Singapore

Fullstack Engineer

08/2021 - 11/2022

- Developed features and maintain a web application to manage physical access permissions for customers across global data centers.
- Collaborated with a cross-functional team of developers, QA engineers, and UI/UX designers to deliver high-quality software solutions.
- Ensure code quality by implementing unit tests with Jest, achieving 100% code coverage in SonarQube
- Participated in hackathon during my tenure to explore innovative solutions and foster creativity within the team.

Technologies used: **Javascript, ReactJS, Typescript, React-Hook-Form, Webpack, Redux, NodeJS, Microfrontend, styled-components, Github Actions, Jenkins, Jest, SonarQube, Confluence**

Daikin Airconditioning Singapore

Singapore

Software Engineer

06/2018 - 08/2021

- Led the transformation of Daikin's Smart home suite into a hybrid mobile application, enabling users to control appliances remotely
- Designed and deployed a web application for device control, streamlining user interaction with IoT-enabled appliances.
- Used C3JS (Based on D3) to create charts for monthly reports on device usage.
- Published 2 mobile applications on Android Play Store and Apple App Store, expanding the company's digital footprint and user engagement.
- Gained hands-on experience with IoT technologies, enhancing home system automation capabilities.

Technologies used: **ReactJS, React-Native, Cordova, jQuery, Ruby, SQL-lite, Android Play Store, Apple App Store**

NCS PTE LTD

Software Developer

Singapore
06/2016 - 06/2018

- Developed and integrated legacy systems into a unified platform for DSTA using Outsystems.
- Handled backend data migration between Oracle and MSSQL databases.
- Collaborated with a mix of traditional waterfall and Agile methodologies to ensure project success.
- Provided ongoing support for over 10 web and mobile applications, maintaining system integrity and uptime.

Technologies used: **Java SPRING, JSP, ASP, Outsystems, Oracle DB, MSSQL, Oracle Weblogic, IIS**

IHIS, Integrated Health Information System (now known as Synapse)

Singapore

IT Analyst

01/2011 - 03/2012

- I started off as a contract on-site technical support for IHIS at NUH and was promoted to IT Analyst right after I graduated from NUS.
- While as a IT Analyst, I helped in the project to transition drug administration to portable, paperless entries.
- Gathered requirements from medical professionals (doctors and nurses) and liaised with development team to implement new features.
- Worked with various hospitals within the NHG cluster, including NUH, SGH and IMH.

Technologies used: **HTML, Javascript, CSS**

A*Star (Clinical Imaging Research Centre)

Singapore

Web Developer

07/2010 - 09/2010

- During my school days, I took up a 3months contract to help A-STAR create a CMS system for their employees
- This includes different admin login modules, event management system, booking of internal facilities such as MRI and PET machines and information pertaining to the department to publicise on their website.
- Developed the foundational system, saving the company an estimated \$30,000 in consultancy fees.

Technologies used: **HTML, Javascript, CSS, Joomla, UI/UX Design**

Marble Slab Creamery(Indulgenze Pte Ltd)

Singapore

Director

07/2010 - 09/2010

- Launched and managed 2 Marble Slab Creamery franchise outlets, overseeing daily operations and leading over 20 people.
- Gained experience in SME management, including team leadership, budgeting and customer service.

Personal Hobbies

MIRA Smart Mirror: Developed my own custom smart mirror application, integrating speech recognition, text-to-speech functionality, and online APIs (such as IFTTT) for controlling home devices (e.g., lights, air conditioning) and other functionalities like reading weather forecasts. Built using AWS for remote device management. I call it MIRA.

Mobile Game Development: Designed and published "Animal Kingdom" a 2D platformer mobile game, on the Android Play Store. Developed using Unreal Engine 4.

Continuous Learning: Passionate about expanding technical expertise by working on personal projects and taking online courses. Recently explored topics including AWS EC2, Machine Learning, Blockchain, and cryptocurrencies. Regularly upskill in modern web technologies such as React, Next.js, Node.js, MERN stack, and Spring Boot 3.

Skills

Frontend Technologies

Javascript, Typescript, ReactJS, React-Native, React-Hook-Form, React-intl, React-router, Redux, GraphQL, styled-components, jQuery, HTML, CSS, Ant Design, Material UI, Microfrontends, Webpack, JSP, ASP

Backend Technologies

Java, Java Springboot, NodeJS(Express), Ruby

Databases

MSSQL, Oracle DB, PostgreSQL, MariaDB, SQL-lite

Unit Testing

Jest, SonarQube

CI/CD

Azure Devops, Bitbucket Pipelines, Github Actions, Jenkins, Docker, Kubernetes

Web Servers

Oracle Weblogic, IIS

Others

Cordova, Android Play Store, Apple App Store
